PROJECTS

Alvarnet

Current

- Alvarnet (this CEP repo) is a React client portal + .NET API + SQL backend for Calian customers to view SOC/security dashboards and configuration.
- Users sign in with Calian credentials (PBKDF2-hashed passwords + JWT) or Microsoft Entra (MSAL), then operate inside an Organization + Azure Tenant context.
- Dashboard v1 runs KQL against Log Analytics workspaces (workspace + app creds stored per tenant) with settings-driven time range/auto-refresh and idle session logout.
